

```
#include<stdio.h>
int main()
{
    char caractere;
    int i;
    i=0; /*initialisation de i*/
    while(i<=5)
    {
        printf("tapez un caractere:\n");
        caractere=getc (stdin);
        printf ("vous avez entré:%c\n",caractere);
        i=i+1;
    }
    printf ("la boucle est finie\n");
    return 0;
}
```

```
#include<stdio.h>
int main ()
{
    char c;
    printf ("entrez un caractere:\n (p pour quitter)\n");
    for (c=' ';c!='p'; )
    {
        c=getc(stdin);
        putc(c,stdout);
    }
    printf ("\n au revoir\n");
    return 0;
}
```
